PRINTED AT THE UNIVERSITY PRESS, BY PONSONBY AND GIBBS.

PREFACE

No proper and full account of Irish versification from the oldest period of unrhymed alliterative verse to the gradual supersession of $dan \ direach$ by English metres can be written until we first have special investigations into its history at almost every point. Meanwhile I have thought it useful to sum up in a concise form the present state of our knowledge both on alliterative and the strict syllabic poetry. I have left aside altogether both the modern metres, the looser forms of syllabic poetry, such as *óglachas* and *bruilingecht*,¹ and the so-called 'rhetorics,' for the latter of which the student should consult Windisch's articles in the *Revue Cellique*, vol. v, pp. 389 and 478.

In my account of syllabic poetry I have followed almost throughout Thurneysen's masterly and lucid treatise in his *Irische Verslehren* in the third volume of Stokes' and Windisch's *Irische Texte*. As he first traced the origin of the syllabic metres to the Latin hymn poetry of the fifth and sixth centuries, so he was also the first among modern scholars to recognize and establish all the essential laws of this kind of poetry. By basing his exposition upon the form of the verse-end in the different metres, he has brought light and order into the chaos of native tradition. The examples by which I have illustrated the various rules and metres are taken either from the Old-Irish treatises printed by Thurneysen --in which case the source is not indicated—or from well-known poems.

It should be noticed that throughout this book an accent denotes stress, not length, which is marked by a horizontal bar. A dot under a vowel marks elision.

I hope that this primer will stimulate Irish students to take up the study of Irish metrics. Almost every paragraph in it calls

¹ See O'Molloy, Grammatica Latino-hibernica, cap. xxi and xxiii.

PREFACE

for further minute investigation, the value of which is not confined to metrics; for it will incidentally add to our knowledge of pronunciation and the history of the language. The part played in rhyme and alliteration by actual pronunciation on the one hand, by tradition on the other; the change in the pronunciation of consonants and vowels, such as th, dh, gh, initial m before consonants, *oi* and *ai*; the effect of sandhi; the division of syllables in pronunciation, &c.--all this and much else it should be possible to establish from a close observation of the laws of rhyme and alliteration. On some of these points Whitley Stokes, in the introduction to his edition of Gorman's Martyrology, pp. xxx-xxxviii, has collected valuable material, and established certain laws. As to the part played by sandhi, I may add an observation, which so far as I know has not been made before, though it is a commonplace in Welsh metrics. If dh and d come together, they have between them the value of *t*, as in the following couplet from Goffraidh Fionn ua Clerigh's poem entitled 'Marbnad De':

marbhnadh De, ni trebhadh tnuidh, garmhac duine dleghar din.

The same rule would naturally apply in the case of gh + g, bh + b.

One word of advice to the beginner will not be out of place. He must accustom himself to read Irish poetry entirely by ordinary wordstress, discarding altogether the fanciful theories as to any regular interchange between stressed and unstressed syllables,¹ or as to any secondary stress enabling certain syllables to carry a rhythmical accent.² At no period can unstressed, half-stressed, or even the fully-stressed final syllables of Munster pronunciation carry such an accent. Unless the ordinary accentuation is followed, neither the laws of rhyme nor alliteration can be properly understood; while attention paid to rhyme and alliteration often teaches us to correctly accent words as to whose stress there may have been any doubt. Thus, some scholars would not have wrongly placed the stress in *didiu* and *dochum* on the final syllable if they had known that these words rhyme with *ligiu* and *toffund* respectively.

¹ Such as the theory put forward by me in the Metrical Excursus at the end of my edition of *Cath Fionntrāgha*.

²As assumed by Zimmer in his Kellische Studien, 11, p. 160.

PREFACE

I hope that the list of poets which is appended will be found useful. It was my intention to include the name of every Irish poet except those still alive; but the list is sure to be both imperfect and faulty. One drawback to its utility is that the tribal name (*sloinneadh*) is sometimes placed immediately behind the Christian name, sometimes at the end. That for completeness' sake I have also included fabulous or mythical poets will not, I trust, annoy anybody.

In conclusion, I desire to thank my friends Professors Bergin and Thurneysen very heartily for many valuable suggestions, and Tadhg & Donnchadha for several important corrections and additions to the list of poets.

K. M.

March, 1909.

IRISH METRICS

1 WE can distinguish three successive periods in the history of Irish versification:

(1) A period of rhythmical alliterative poetry (Early Irish).

This period lasts on into (2).

(2) A period of unrhythmical syllabic poetry, i.e., poetry containing a fixed number of syllables in each verse, with end-rhyme or consonance, internal rhyme, and alliteration (Old, Middle, and Early Modern Irish).

(3) A period of rhythmical poetry in which the same sequence of vowels recurs in the stressed syllables of each verse (Later Modern Irish).

The last period lies outside the scope of this primer. It arose towards the end of the sixteenth century, probably under the influence of English poetry, and continues till the present day. For a description of the metres commonly used during this period, and for the distinction between the two chief classes of these metres (amhrán and caoineadh) see P. Dinneen, Amhráin Eoghain Ruaidh uí Súilleabháin, pp. xxxix ff.; L. C. Stern, Cúirt an Mheadhóin Oidhche (Zeitschrift f. celt. Phil. v., pp. 286 ff.); D. Hyde, A Literary History of Ireland, pp. 548 ff.; Mac Erlean, Dánta, Amhráin is Caointe Seathrúin Céitinn, pp. 13-15.

A. Alliterative Poetry

2 Few specimens of the rhythmical alliterative poetry of the first period have reached us. Those we have are mostly to be found scattered through some of the oldest sagas, often side by side with poems in the later syllabic metres.

IRISH METRICS

3 The following are the principles and laws of versification.

(1) Each line contains a certain number of stressed syllables, generally four. A pause or cæsura divides the line into two halves. The half-lines end in disyllables.

Windisch, Irische Texte I., p. 103:

Fo-chén Cónall,	críde lícce,
lóndbruth lóga,	lúchar éga,
gúss flánd férge	fo chích cúrad

Revue Cellique, vol. xvi., p. 277 (Dindsenchas § 160):

Éo Róssa,	róth rúirech,
récht flátha,	fúaimm túinne,
déch dúilib,	díriuch drónchrand,
día drónbalc,	dórus níme.

(z) Some of the stressed syllables in every line alliterate; but the principle and distribution of alliteration vary greatly, as will be seen from the following examples:

Ib., p. 104:

Fo-chén Cét, Cét mac Mágach, mágen chúrad, críde n-éga, éithre n-éla, éirr trén tréssa, tréthan ágach, cáin tárb tnúthach, Cét mac Mágach.

Ib., p. 211:

Fo-chén Lábraid	lúathlain ar chláideb,
láichdu õ caib,	ū allchu m úrib !
M ánnraid g óssa,	gnfid cáthu,
c ríathraid ócu,	tóchaid lóbru,
t áirnid t ríunu,	fo-chén Lábraid!

Here, in the fourth line, it seems sufficient that *criathraid* should alliterate with *cathu* in the preceding line, unless we may substitute *ocbaid* for *tocbaid*. Cf. *ocbaid*, BCr. 18 d 2.

Ib., p. 276 :

Gréit ríg, sénrechtaid búada, bárc bódbae, brúth brátha, breó dígla, dréch cúrad, cúinsiu chórad, críde ndrácon, &c.¹

For further examples see *Dindšenchas* 42; *Togal Bruidne Då Derga* § 157, ib. Appendix § 150; *Täin Bö Cūalnge* (ed. Windisch), ll. 4956, 5636, 5731, 5784, 5829. Longer lines will be found Ir. T. I., pp. 23 (cf. *Thes. Palwo-hib.* 11., p. 322), 211, § 18, 212, 261, 262, 263, 267, 268, 270, &c.

Alliteration

4 The following rules apply both to the purely alliterative poetry of the first period and to syllabic poetry. Cf. \S_{21} . It is to be noted that, even in Old-Irish, alliteration is traditional and no longer based upon pronunciation.

(1) Any vowel may alliterate with any other.

(z) A consonant can alliterate only with itself repeated, or, except f, s, p, with its lenited form, so that e.g. c may alliterate also with ch (i.e. χ), and l with lh (i.e. p, later h).

NOTE.—In Old and Early-Middle Irish poetry, s, and any combination of s with other consonants, such as sc, sl, sm, &c., may alliterate.² In Later-Middle and Early-Modern Irish poetry, s followed by a stop (sc, sp, st) can only alliterate with itself and the same stop, while s followed by a vowel and s followed by a liquid or nasal may alliterate with each other.

¹ Professor W. P. Ker (*The Dark Ages*, p. 321) has drawn attention to the analogies between Irish alliterative verse and the following specimen of ancient Latin:—

uti tu morbos visos invisosque viduertatem vastitudinemque calamitates intemperiasque prohibessis, defendas averruncesque: uti fruges frumenta vineta virgultaque grandire beneque evenire siris, pastores pecua salva servassis duisque bonam salutem valetudinemque mihi domo familiaeque nostrae. Cato, De Re Rustica, 141: arranged by

F. D. Allen, Early Latin.

² As the possibility of s, sl, sr, &c., alliterating with sc has been denied by Prof. Atkinson (On Irish Metric, p. 8), 1 subjoin a few examples from the older syllabic poetry:--Fél. July 8: scribnid sõerbüaid. ib. 12: scél cech senaid. ib. Aug. 25: ro sreth scél. Saltair na Rann, l. 2257: ocht mbliadna sescat, nī scail. ib. 4365: soillsi scuir. ib. 6031: as sĩa do scél. ib. 6591: stethaib scél. ib. 7337: sãerda in scél, &c. (3) In a word beginning with f, the following sound counts for alliteration, e.g. d'*i*arraid *l'i*anbothe, a chrīch *u*ile d' *fo*lmugud.

NOTE.—Occasionally \dot{f} is found to alliterate with f, as: do \dot{f} eiss la Feirb, Ir. Texte III., p. 520, l. 803, an alliteration merely for the eye.

(4) \dot{s} (= h) before vowels should alliterate only with itself repeated. But it is also found to alliterate with lh, e. g. Salt. na Rann, 1577: dēna mo lhinchosc di šain. Book of Fenagh, p. 296, 22: do Zhigernach's do Śinchell. ib. p. 228, 30: gēbtait in tīr lhūaid da šīl. Or it is treated as quiescent, so that the vowels alliterate, e.g. cõic bliadna do Šētna ard.—ic athchumai int šeisir.— LL. 130 b 39: bliadain ar fichit ö šain. SR. 2051: ar is derb lat t'ēc di šain. Book of Fenagh, p. 202, 1: do šamla nī fuil. This is always the case where it precedes a consonant, as: dot ślaidi frit šlūagaib, TBC. (ed. Windisch) 3439. is Maine co līn a šlõig, Book of Fenagh, p. 320, 21.

NOTE 1.—As f with f, so \dot{s} may also alliterate (for the eye) with s, as: is \ddot{e} ro-suidig each s \ddot{e} is, SR. 323. $s\ddot{e}$ t ro-s \dot{s} aig, ib. 471. is \ddot{e} sin senchas each sin, E. Gwynn, Poems from Dindsenchas, p. 38.

NOTE 2.—We see from these rules that the laws of alliteration were fixed after lenition or 'aspiration' had affected initial c, t, p, f, and s.

(5) *n*- before vowels (in eclipse) and h, as in a n-athair 'her father,' co heim 'readily' &c., do not count for alliteration, e.g.

tarlaic Oscur irchor n-oll, Ir. T. 1., p. 158. Almain cona hardrāthaib, Poems from Dinds. p. 14.

(6) As the laws of alliteration were fixed before the change of nc to g, nt to d, nd into nn, mp to b, and of mb into mm had taken place, and as these laws became traditional, c may alliterate with g (written c in Old- and Middle-Ir.), t with d (written t), p with b (written p), b with mb, d with nd, as: cāin a clū 'fair their fame,' **B**ērre co mblaid, dercaim in ndomun.

(7) Only unstressed words (*iarmberla*) may stand between alliterating words, e.g:

īar mbrúindiud duit cech báegail.

B. Syllabic Poetry

5 The mass of Irish poetry from the eighth to the seventeenth century is composed in metres requiring (1) a fixed number of syllables in each verse, (2) rhyme, or consonance, in the final word of each verse or couplet. There is no rhythm (regulated stress), except in the rhyming words at the end; and in the *debide*-metres (see § 16) even the rhyme is unrhythmical.

Examples:

(a) Cech mártir, cech díthrubach,	cech nóib ro-bói i ng <i>énmnai</i> ,
rop scíath dún diar n-ímdegail,	rop sáiget úan fri d <i>émnai</i> .

Here we have seven syllables in each verse, and disyllabic rhythmical rhyme at the end of the couplets.

(b) Mésse ocus Pángur bān, céchtar náthar fria sáindān:
 bīth a ménma-sam fri séilgg, mu ménma céin im sáincheirdd.

Here, in a *debide*-metre, we have seven syllables in each verse and monosyllabic unrhythmical rhyme at the end of the verses, the rhyming syllable in the first couplet being stressed, while in the second it is unstressed.

NOTE.—As Thurneysen, Zur irischen Accent- und Verslehre (Rev. Celt. VI., pp. 336-347), has conclusively shown, this metrical system was derived from Latin hymn-poetry of the fifth and sixth centurics. See also Wilh. Meyer, Gesammelte Abhandlungen zur Mittellateinischen Rhythmik, vol. 1., pp. 174 ff. The pattern upon which some of the oldest Irish metres were modelled is to be found in such trochaic measures as S. Hilary's Hymnus in laudem Christi, beginning:

Ymnum dicat turba frátrum, ymnum cantus pérsonet, Christo regi concinéntes laudem demus débitam.

Here the first verse of each couplet contains eight, the second seven syllables. The first verse ends in $\angle -$, the second in $\angle -$. The two couplets form a quatrain. In the following example from St. Colman's *Hymnus in laudem* S. Michaelis Archangeli, the couplets are joined by rhyme:—

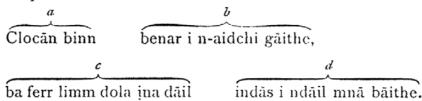

Gloria sit semper Déo patri atque filio Simul cum spiritu sáncto in uno consílio.

6 Every poem (dúan f., or lóid f.) consists of a varying number of stanzas (rann m., or comarg) each of which must make independent

sense (cobfige cëille). The most common form of the stanza is the quatrain consisting of four verses (rann f., or cethramthu f.). These are called rann tuisech, r. medönach, r. leth-dedcnach, r. dedenach.

7 The two first verses and the two last form couplets (*leth-rann* m.), and are distinguished as *leth-rann tūisech* and *leth-rann dedenach*, or *seolad* and *comad*.

Example:

Here we have a quatrain consisting of four verses (a, b, c, d), of which a + b and c + d form couplets.

8 The various metres (*aiste* f.) are distinguished (1) by the number of syllables required in every line; (2) by the form and position of the rhyme.

Technical Terms

9 A syllable (*sillab* f.) or a number of syllables, as a metrical unit, is called *deach* (m.), corresponding with Latin *pes* 'verse-foot.'

Feet varying from one to eight syllables are distinguished, as follows: dialt n. (n. pl. dialta) 'one syllable'; hence dialtach 'monosyllabic.' recomarc 'two syllables'; recomarcach 'disyllabic.' iarcomarc 'three syllables'; iarcomarcach 'trisyllabic.' feles (n. pl. felesa) 'four syllables.' cloenre 'five syllables.' luibenchossach 'six syllables.' claidemnus 'seven syllables.' bricht (n. pl. brechta) 'eight syllables.'

10 The rhyming verse-end is called *rinn* (n. pl. *rinn*, Mid. Ir. *renna*) and the rhyme itself *cuibdius* (m.). *Lân-chuibdius* denotes the rhyme at the end of the couplets, *sal-chuibdius* that at the end of the first and third verses of the quatrain. The latter we shall call cœsura.

Example:

1s $\mathbf{\tilde{e}}$ Fedlimid in $r\tilde{z}$ diarbo monar \bar{o} inlathiaithrige Connacht cen ch*ath* ocus Mide do mannrad.

Here $r\bar{i}$ and chath stand in caesura, while \bar{v} inlathi and mannrad form lanchuibdius (debide, see § 16) with $r\bar{i}$ and chath respectively.

Rhyme

11 Rhyme proper commences with the stressed vowel of the word, and consists in the agreement of all the vowels both in quantity and quality, while the rhyming consonants must belong to the same class. Thus in early Old-Irish $\bar{a}i$ can only rhyme with $\bar{a}i$, as $c\bar{a}in: \bar{a}il$, $\bar{o}i$ with $\bar{o}i$, as $c\bar{o}il: fr\bar{o}ich$, \bar{a}^i with \bar{a}^i , as $m\bar{a}^ir: d\bar{a}^il$, \bar{o}^i with \bar{o}^i , as $m\bar{o}^ir: sr\bar{o}^in$, &c.

But in later Old-Irish the diphthong $\tilde{o}i$ ($\tilde{o}e$) and $\tilde{o}i$, and the diphthong $\tilde{a}i$ ($\tilde{a}e$) and $\tilde{a}i$ are allowed to rhyme.

12 In the older poetry the consonants fall, for the purposes of rhyme, into the following three classes :---

(1) The stops c(gg, g), p(bb), t(dd), which may rhyme with each other either by themselves or in combination with liquids, or spirants. Examples : $c\bar{c}t$: $\bar{c}c$, carpat : arcat, $sl\bar{c}cht$: $d\bar{c}c$, Cuilt : fuit, purt : mucc, bochtán : corpán.

(2) The liquids l, r, the nasals n, ng, m, and the spirants d(=dh), g(=gh), b(=bh), m(=mh), ch, th, f, which may rhyme either by themselves or in combination with each other, but so that 'aspirated' consonants rhyme with 'aspirated,' 'unaspirated' with 'unaspirated' only. Examples δl : $m\delta r$: $r\delta n$, $d\sigma rus$: tomus, dangen: angel, trebair: degaid, rethes: teches, scith: tir: rig, ainm: airm, duine: suide: tuige, cathrach: athlam, foglaimm: comraind, seng: lenn, tinn: Birn, lachtmüad: attrüag, taidbsigud: faillsigud.

NOTE.—After long vowels final *ll* may rhyme with single consonants of this group, as: *ccill* : *ccin*, *ciall* : *siar*.

(3) s can only rhyme with itself, as mis: scis, rethes: teches, bossa: cossa. See Thurneysen, Rev. Celt. v, 329; VII, 305.

13 In later times stricter rules prevail, according to which consonants are classed as follows:

(1) Voiceless stops: p, c, t.

(2) Voiced stops: b, g, d.

(3) Voiceless spirants : f, ch, th.

(4) Voiced spirants: bh, dh, gh, mh, and l, n, r.

(5) Double consonants : ll, m (O. Ir. mm, mb), nn, ng, rr.(6) s.

NOTE.—Homonyms may rhyme, as e.g. $d\bar{u}n$ 'a fortress' and $d\bar{u}n$ 'to us,' fichit 'they fight' and fichit 'scores.'

Consonance

14 We have to distinguish between consonance in monosyllables and polysyllables.

(1) In monosyllables consonance consists in the stressed vowels and the following consonants being either palatal or non-palatal, while the consonants must also belong to the same class.

Example:

Trī maic Nera ar līn lérg, trī maic Uislend, cobra ngárg, senlāech Arad nād bo bórb, a Crūachnaib Con-alad árd.

(2) In polysyllables consonance begins with the first unstressed syllable of the word. Cf. § 25. The consonants must belong to the same class, and both vowels and consonants must be either palatal or non-palatal.

Examples:

(a)	Fland tendālach Témrach,	tendrī Fötla fér <i>ainn</i> ,	
	òtha anall do-mén <i>aimm</i> ,	is sī a chland do-gég <i>ainn</i> .	
(b)	In spirut nõib d'áittreb	ar cuirp is ar n-ánma,	

diar snādud co só*lma* ar gābud, ar gá*lra*.

Here the *-aimm* of *domenaimm* consonates with the *-ainn* of *ferainn* and *dogegainn*, and the *-lma* of *solma* with the *-nma* of *anma* and the *-lra* of *galra*.

15 A quatrain in which all four verses consonate is said to be *cethar-chubaid*. When there is no consonance between the verses, the metre is called *scāilte* 'loose.'

Debide-rhyme

16 There is a third kind of rhyme which only occurs in the metres called *debide*. See § 33. In these the two verses of the couplet rhyme; and if the first verse ends in a monosyllable, the second must end in a disyllable or trisyllable; similarly, if the first ends in a disyllable, the second must end in a trisyllable. In the first verse the rhyme begins with the last stressed vowel, while in the second the unstressed final syllable or syllables form the rhyme, which is thus unrhythmical.

Examples:

- (a) Ro-slēchtatar uili jar lār slūag n-ūag na n-angel nóibnār, rogādatar co Dīa ndil im dīlgud cinad Ādaim. SR. 2169.
 (b) I cūairt nam-mūr, mõr n-áthbach, immedön na prímchathrach
- lēbinn glainidi gl*ördai*, drochte dronai dérg*ördai*. SR. 473.

17 In debide there is greater freedom of rhyme, amounting sometimes to mere consonance. Thus guth may rhyme with tinfiud, leirg : firmimint, glan : airmite(a)n, glana : cāindromma, alt : fichet, breis : legdais, cachta : comblechta. A long vowel may rhyme with a short one, as glē : commairge, $t\bar{i}$: bīi, snā : indrada, bō : dartado, $cl\bar{u}$: ingnu.

Internal Rhyme

18 Both in those metres in which the single verses rhyme, and in those in which the couplets rhyme we often find additional rhymes between a word or words in the first and second, and a word or words in the third and fourth verses. This is called internal rhyme. It occurs already in Latin hymn-poetry, e.g.

Conclamantes deo d <i>ignum</i>	h <i>ymnum</i> sanctae Máriae.
ut vox pulset omnem aurem	per laudem vicariam.
opp ort<i>unam</i> dedit c<i>uram</i>	aegrotanti homini.

19 We can distinguish two kinds of internal rhyme:

(1) A rhyme between the word in cæsura (§ 10) and some word in the second verse of the couplet. This is obligatory in the second half of all non-*dcbide* metres whenever there is no consonance between the word in cæsura and the end-rhyme (§ 15). The technical name for this kind of rhyme is *aiccill* ' anticipation,' and a stanza containing it is called *aicclech*.

Examples:

- (a) In ba maten, in ba fuin, in ba for tīr no for muir, acht ro-fetar racha d' ēc, mor in bēt ! nī fetar cuin.
- (b) Guidiu itge doaib, romm-ain aratrogbus
 cain popul co *ligdath*, in *rigrad* im-rordus.

Fél. Prol. 17.

(2) A rhyme between any word in the first verse with any word in the second verse of a couplet. Though this cannot be said to be obligatory, it enters largely into poetry of almost any metre, especially in later times.

Examples :

(a) Rī cach thuir th <i>ūathaig</i> d <i>ēin</i> deirg	ro-f <i>ūathaig</i> f <i>ēin</i> firmimeint,
feib ba d <i>erb laiss</i> ōs cach maig	ros-delb don maiss ecruthaig.
	SR. 145 ff.
(b) Lesc amlesc sinn co Ath Cliath,	co dun Amlaib na n-òrsciath,
õ \overline{A} th Cl <i>iath</i> na l <i>ann</i> 's na lecht	is dian, is mall mo imthecht.
	Mac Liac († 1024)
20 The heaping of internal r	hyme is technically called

breccad, e.g.

Ua Brice Bregain ond lice lebair tice i Temair toraib, muir dar Mumain, daig nā dubaig, traig dar Tulaig Tomair.

Alliteration

21 In the oldest syllabic poetry alliteration (*ūaimm* n.) occurs only sporadically and without any fixed laws: indeed some poems or parts of poems show no trace of it. See e.g. Broccán's *Hymn* 65, 67, 69, 71, 73, &c.; *Imram Brain* 27, 28, 30, 37, 49; *Otia Mers.* I. 122, 1.3; *Zeitschr.* III. 216, 1.4. In the course of time its employment becomes more regular.

In Filire Oingusso there is alliteration in every stanza; and in Saltair na Rann, though occasionally we find a whole quatrain without alliteration (e.g. 329 ff.), as a rule one verse at least contains it. At a later period it appears obligatory in the third and last verses of a quatrain; and in the poetry of the twelfth and following centuries we often find every verse of a poem containing it.

22 Alliteration in the final words of the verse is called $f\bar{i}r$ - $\bar{u}aimm$; when it occurs in other positions it is called $\bar{u}aimm$ gnūise.

Uaimm di rind denotes alliteration at the end of a poem. See Book of Ballymote, p. 322^b46.

Connecting the last word of a stanza by alliteration with the first (or the first stressed) word of the following stanza, a practice much used in longer poems as an aid to memory, is in Middle Irish technically called *fidrad freccomail*, in Later Irish *conachlann*. It is often merely alliteration for the eye.

Elision

23 In the oldest poetry elision $(b\bar{a}dud)$ was but rarely practised; and it cannot be said to have been obligatory at any time during the Old and Early-Middle Irish periods. Verses in which hiatus occurs are to be found almost in every poem. For examples see Thes. 11. 291, 16. 292, 21. 293, 25. 294, 1. 295, 15 &c.; Trip. Life 112, 15. 17. 186, 13. 19. 468, 6. But in Later-Middle Irish an unstressed vowel after a word ending in a vowel is generally elided, as in the following heptasyllabic lines:

> ro īad impi a dā rigid. co mbōi jmmedōn na airce. fri Eua ocus fri Adam.

24 Elision also occurs sometimes between the end of one verse and the beginning of the next, as e.g.:

lechta trī mac nDiarmata	i fothaig mulind maic Dīmma. LL. 43 ^b 42.
adteoch in dā mesraigthe,	adteoch in dā ūarda.
mo bith-se im sudiu fri rē	ịc gudiu Dē in nach dū. <i>Eriu</i> I., p. 39.

25 For metrical purposes a word begins with the stressed syllable, so that the proclitics, such as verbal prefixes, prepositions, &c., do not count as part of the words to which they are prefixed. Examples : *iar-sín*, *co-sé*, *immal-lé*, *im-mách*, *im-máig*, *imma-séch*, *in-nócht*, *in-diú*, *a-réir*, *san-chán*, *fo-chén*, *fo-déin*, *fo-déssin*, *imme-gáib*, *cota-gáib*, *al-áile*, *fo-chétoir*, *imné*, *nammá*.

On the other hand, the pronominal suffixes *-sa*, *-se*, *-su*, *-si*, *-ni*, *-sin*, *-som* count as part of the words to which they are suffixed, so that e.g. t'athair-su forms a trisyllable. Distinguish between *dnd-sin* and *dnd sin*.

26 Note that in many words two vowels, which in the later language form one syllable, were disyllabic in Old and Early-Middle Irish. The following are some of the most common words :--aër 'air,' biād 'food,' biāid 'will be,' &c. Böänd 'the Boyne,' coïr 'just,' criād gen. of crē 'clay,' cuāid 'he went,' deāc 'ten,' deād 'end,' dīā 'day,' diād gen. of dē 'smoke,' diās 'a pair,' diāb 'of them,' doīb 'to them,' eö (gen. iāch) 'salmon,' fiāch 'raven,' foë ' under her,' friā 'towards his' (frië, friü), glāö 'fight,' gnīā 'servant,' leö 'lion,' lia 'with her,' liä 'stone,' lūä 'kick,' lūäm 'helmsman,' nīä 'champion,' nūä 'new,' öäc 'young,' rēë gen. sg. of rē 'time,' riäm 'before,' röë 'field,' scīäch gen. of scē 'hawthorn,' siächt 'reached,' siän 'strain,' siür 'sister,' suäirc 'pleasant,' tõë 'silence,' triär 'three persons,' tuüs 'leadership,' üä 'grandson.'

The name Eögan (Gaul. Esugenus) counts as trisyllabic in the oldest poetry.

Aphæresis

27 In order to obtain the requisite number of syllables, aphæresis of unstressed syllables is often resorted to, though this is not always expressed in writing. Thus *isin* has frequently to be read 'sin, is ' and ' 's, immach 'mach, co rogénair cor' génair, &c., as in the following examples of heptasyllabic verse :--

> isin amsir sin cen ord bind, LL. 131ⁿ1. co rogēnair macc maith Maire, LL. 131^a18.

How to conclude a Poem

28 The concluding word (*iarcomarc*) of every poem must repeat either the whole or part of the first word (or first stressed word) of the poem (*focul tūisech*). The repetition of the whole word is technically called *saigid*; that of half the word, *ascnam*, and that of the beginning only, *com-indsma*, as the following quatrain teaches:—

Comindsma do 'Dondchad' 'dō,' ascnam 'dond' im cach deglō, saigid so, is ē in slicht amra, 'Dondchad' in t-ainm ollamda.

Syntactic Licences

29 In the older poetry a freer order of words than in prose is occasionally found. Thus both the substantive and adjective attributes may precede the noun on which they depend, e.g. Locho Uair ard āige 'Lough Owel's high pillar'; lir dar döe 'over the sea's rampart'; i nOchtimbir ēlun 'in October's front'; ro-fāith garb gam 'fierce winter has gone.' Sometimes one adjective precedes, another follows, the noun, as brass glass gel 'a prattling shining brook.'

30 The accusative object and the instrumental sometimes precede the verb, as *lucht fris' failti feraim* 'the folk to whom I make welcome'; *re notlaic aird airgaiss dognē* 'before high Christmas thou shouldst make great prayer'; *dēra dam, a Dē*, *cē no-bēra acht tū*? 'who will give me tears but thou, O God?' brūïd clūasaib cluinethar 'it crushes him who hears it with ears,' Ir. T. I., p. 68.

The Metres

31 We can distinguish four chief groups of different structure, as follows:

I. Stanzas with rhyming couplets, in which both the verse and the verse-ends are homosyllabic.

II. Debide-stanzas. See above, § 5(b).

III. Stanzas with rhyming couplets containing

A. heterosyllabic verses and homosyllabic verse-ends,

B. homosyllabic verses and heterosyllabic verse-ends,

C. heterosyllabic verses and heterosyllabic verse-ends.

IV. Stanzas of different structure.

I.

32 The most common metres of this group are those called *Rannaigecht*, in which the verse-ends are either monosyllabic or disyllabic, and *Cas-bairdne*, in which the verse-ends are trisyllabic.

1. Rannaigecht dialtach (mõr), consisting of heptasyllabic verses with monosyllabic verse-ends $(7^1 + 7^1)$:

Cētāin luid Iudas tar ord i lorg demna, dīgal garg, cētain ro-gab saint imm saich, cētāin ro-braith Isu n-ard.

2. Rannaigecht recomarcach (bec), $7^2 + 7^2$:

LL. 21⁸6:

A Emain idnach óibinn	asa fidrad ad-f <i>èdim</i> ,
is mör ndīne dit' gūalainn	ro-gab rige for <i>Erinn</i> .

3. A common variation of these two metres consists in the shortening of the first verse to three syllables, so that we get 3¹ + 7¹ + 7¹ + 7¹ and 3² + 7² + 7² + 7² respectively (rannaigecht garit).
(a) Rannaigecht garit dialtach :

A Rī rind! cid dub mo thech no cid find,

nocho n-iadfaider fri nech, när' iada Crist a thech frimm.

(b) Rannaigecht chetharchubaid garit recomarcach:
 Corp slemon ocus tõib fota remor:
 biaid in cholainn oc lobud is in t-anim oc demon.

4. A shortening of the first verse to two syllables is less common :

Māeldub bidbu na ndemon ndāerdub,

acht a chuilche is a bla līn nochor' techt nī din tsāegul.

Another example, RC. 20, 404, § 124.

5. When the whole first couplet is replaced by a verse of three syllables, the metre is called *treochair*.

Cen *āinius*

in chaingen dorigenus: nech ro-charus ro-crāidius. Other examples, Liadain and Curithir, p. 22 fl.

6. Rindaird (or leth-dechnach), 6² + 6².
Fēlire Öingusso, Prol. 313 ff.: Mani tuicce samlid ord fil for ar lõidib, not-dlomaim fīad dālaib, it dallchēilliu dõinib.

7. Brecc-bairdne denotes a variation of rindaird, in which the first verse has only five syllables, $5^2 + 6^2$:

Adram in Coimdid cusna aicdib *amraib*, nem gelmar co n-ainglib, ler tondbān for t*almain*.

8. Slat brecht mör, $6^3 + 6^3$:

Less Rūadrach rebānach,	'sē slūagach sr <i>ibānach</i> ,
less n-ēnach n-ailēnach,	less férach f <i>idánach</i> .

9. Cas-bairdne, $7^3 + 7^3$.

LL. 52^b44:

Cormac Femin, Fogertach, Colmān, Cellach cr*ūaid-ugra* co mīlib do-rochratar i cath Belaig m*ūaid-Mugna*. Other examples: LL. 27^b54, 149^b1; Silva Gad., p. 372; ib. p. 388. 10. Snām sebaic (ar chasbairdne) is the name for a variation of casbairdne, in which the third verse ends in a monosyllable:
Cenn Escrach na n-aballgort, adba dona *îathbechaib*, muine luchair for a lār, itā stāb do st*īallehlethaib*.

Other examples, Lismore Lives, p. xxxviii. 24; ib. l. 777.

11. Carn-rannaigecht¹ mör, $8^1 + 8^1$:

A Mathgamain ùi Chennglain chōim, a 'ir ind airm athramail *āin*, is tu-su ar tigernæ-ni tnùith immon Siūir simenbuidi sl*āin*.

12. Rannaigecht bec mör (or Carn-dechnaid), 8² + 8²:

A maic rīg na Cairce a Cūalainn, fīn duit is mid mailte m*oidim* : is frit, a mīlid, a mālainn, dālaim do-ririb ic R*oirinn*.

13. Druimne sūithe na bairdne, 8 ³ + 8 ³ : Tech Duind dāmaig, dūn Congaile, carrac rúadfāebrach
rāthaigthe,
ràith rig fri lân lir féthaigthe, fail nir, nett grīfe grādaigthe.
14. Oll-chasbairdne, $8^4 + 8^4$:
Rī Achaid Uir ibairdraignig crathaid in lūin lethanmerlig: ocon maigin muiredruimnig Laigin ina lebargemlib.
15. Ai idan, $9^2 + 9^2$:
A mạic hũi Chuind, cella do chabair, a glec imm thuind, a thenga tamain,
a maic hūi Chuind, a chrithre imm chella, a rigthe gerra glassa gadair.
16. Suirge mall or anair rindaird, $3^1 + 3^1$:
Scēl lemm dūib : dordaid d am ,
snigid gaim, ro-faith sam.
Other examples, RC. 23, p. 412, §23.
17. Anair or anair tintūdach, 3 ² + 3 ² :
Scian scothas, rind rethes,
līag lothas, tind teches.

¹ The addition of *carn* (*carr*) to the name of a metre denotes that an original metre of six or seven syllables has been extended to eight syllables.

18. Trian rannaigechta moire, $4^1 + 4^1$:

Aed Ailig uill, orb rīgi rāin, recht borrfaid buirr, bārc ordain āin.

Other examples, RC. 20, p. 132; Silva Gad., p. 242.

19. Rannaigecht bec bec, $4^2 + 4^2$:

Find ūa Buidi, lind i mblede, diūltad dona, īchtar eme.

Another example, Silva Gad., p. 385.

With rhyming cœsura this is called *senamain*; while *snaithe senamna* denotes a form of this metre in which the noun in cœsura is repeated in another case in the next verse, as:

Mad co ablaig ablach Arann, mad co Muirgel Muirgel Manann.

20. Lethrannaigecht mör, $5^1 + 5^1$:

Dia limm fri cach snīm, triär ūasal *öin*, Athair ocus Macc ocus Spirut n*õib*.

Other examples, RC. 20, p. 158, §7; ib. 23, p. 418, 1; LL. 18^a, 88^a, 148^a; LU. 119^a15; Silva Gad., p. 4-17, 245, 386; Arch. III., p. 222; ib. p. 232. With shortening of the first verse to three syllables, Lism. Lives, l. 887.

When the stanza consists of eight verses instead of four, it is called *lethrannaigecht mör chorränach*.¹

21. Rindaird bec, $5^2 + 5^2$:

A Gilla Cõimgin maic Gilla Chomgaill, a Laignib labraim ön dairbrig dondguirm.

Other examples, LL. 297^a31; Ultan's Hymn on Brigit, Ir. T. I., p. 24; Ériu II., p. 89: all scaille.

22. Blogbairdne, $5^3 + 5^3$:

A rī ordnidi ūasail adamri,

bid dom chomairli cuairt cen balamli.

Other examples, RC. 16, p. 18.

23. A stanza of six verses in this metre is called *rothnūall bairdne*:

Amlāib airchingid	Atha airtheraig	Erenn <i>iathaige</i> ,
dagrī Duiblinde	dēne dūthaige	trēne trīa/haige.

¹ Corrānach generally denotes an extension of a quatrain either to six or eight verses. See Thurneysen, Ir. Versl., p. 132.

II.

33 24. Debide scailte. All the verses have seven syllables, and there is neither rhyme nor consonance between the couplets.

Examples :

- (a) Debide scāilte na scēl, nī hi-side nād áthgēn,
 is ī-seo ind aiste blāith bráss i ngnāthaigther in sénchas.
- (b) Mo-chén, a chlaidib Chérbaill, ba menic i mórenglaim, ba menic ac cur chátha, ac dichennad árdflatha.

RC. 20, 9.

NOTE.—In later Middle-Irish the stricter laws of versification $(dan \ dar ach)$ demand that the termination of the couplets (aird-rinn) should exceed that of the first verse (rinn) exactly by one syllable, as in the examples above; while in less strict versification $(\delta glachas)$ a trisyllable is allowed to rhyme with a monosyllable.

25. Debide imrind. The couplets rhyme, so that all four verses are joined by rhyme or consonance. The first verses end in a monosyllable.

Example :

Öp-sa becān gabsus gleith i tır chāich cen *īarfaigid* : nocho n-acca beolu eich amail beolu ind l*īathainig*.

26. *Emain imrind*. This is a variation of *debide imrind*, in which the first verses end in a disyllable.

Example:

Is imda duine $d \dot{a} t a$ ocus cuire c*īallbrata*, is imda samthach f $\dot{a} t a$ ic slūag dabchach D*īarmata*.

27. As in rannaigecht (32.3), so in debide a verse of three syllables may take the place of the first verse (debide garit). If the first verse ends in a disyllable, the metre is called debide cenclach:

Ní f*étar* cia lasa faifea *Etan*, acht rofetar Etan bán nochon faifea a höenarán.

IRISH METRICS

28. When both couplets end in a verse of three syllables, the metre is called *debide ecoitchenn*. When these three syllables form one word, the metre is called *debide airend*:

Rī Ele cuin tēit im-mách	slúaiged <i>ach</i> ,
nĩ tora ạm-muig is ē sl <i>ān</i>	Rīgbard <i>ān</i> .

29. A metre in which the verses of each couplet are joined by rhythmical rhyme is called *debide guilbnech*.

(a) Debide guilbnech dialtach :

In t-ēn gaires assin tšail, ālaind gulbnēn is glan gair, rind bind buide fir duib druin, cass cor cuirther guth ind luin.

(b) Debide guilbnech recomarcach :

Fiū mōr do maith Māel-F*ābaill*, inmuin ōcrī ard *ālaind*, ētrocht bass fo beinn b*ūabaill*, buide a folt dar a g*ūalainn*.

(c) Debide guilbnech cummaisc (shortened):

Nom-geib férg fri cach n-indmas acht mo délg : mo delg cia thèis triam' dérnainn, ferg fri suide nī dérnaim.

30. These metres again admit of shortenings, as in *debide smitach*, which replaces the first and last verse by a trisyllable. Similarly, *debide baisse fri toin* replaces the first verse by three syllables, the last by a monosyllable, as:

Trūagān trūag, nocho tabair do neuch lūag: do-beir a n-as cumang d \bar{o} : $b\bar{o}$.

31. Debide imrind cenntromm¹ has eight syllables in each verse, the first verses ending in a disyllable, the couplets in four-syllabic words.

Example :

A maic Flannacāin ūi Chéllaig,	a rī in tīre t <i>áicetbennaig</i> ,
a gabāil srēin brainig bénnaig	os muing airig áicetphellaig.

¹ The addition of *cenntromm* to the name of a metre denotes the extension of the end-rhyme from three to four syllables.

III.

34. A. Stanzas with rhyming couplets, containing heterosyllabic verses and homosyllabic verse-ends.

32. Dechnad fota, 82 + 62.

LL. p. 265^a:

Masat almai co ndath almai, nīdat almai ch*ōilbō*, atā fer bec bertas fāebra for muin cecha h*ōinbō*.

When a third couplet is added, the metre is called *dechnad fota fordālach* :

- 1b. Darlimm nīdat frossa snechta, acht mad fir bic bechta, atāt ina ngrindi garta ūas na rindi rechta, fer fo cach starga chrūaid chorcra, is adbul ind ella.
- 33. Dechnad mör, $8^2 + 5^2$:

Cuir failti frimm, a rī Rõirenn, a lind buidi b*ūaball*, a glas ar oscaraib Erenn, a chostadaig C*ūalann* !

34. Snēdbairdne, $8^2 + 4^2$:

Ro-dal foraib Crist mac Muire, mod ar-canai, imrol tocaid ocus ordan ocus anai. Arch. III. p. 297.

Other examples, LL. p. 35^b, 45^a1, 21; 45^b39, 181^a, 182^a, 183^a; YBL. p. 196^b; O'Grady, Cat., p. 510; Anecd. I., p. 50.

35. This metre may be varied by placing the four-syllabic verse first (*ollbairdne Rūamainn*, $4^2 + 8^2$), or by alternately placing it first or last (*dechnad cummaisc*):

A n-asbermais īarna cōrai, cruth as d*ēiniu*, nī fil fo grēin fairind find fēil basid f*ēiliu*.

Arch. III. p. 297.

36. Dechnad mrechtfelesach or cro cummaisc etir rannaigecht moir ocus sruth di aill, $8^1 + 4^1$:

A Flaind, at tūalaing gaiscid grind co Maistin maill, at glan, at gāeth, is garg do rind, at lāech, a Flaind! 37. Cummasc etir rannaigecht möir ocus lethrannaigecht, $7^1 + 5^1$.

LL. 370°17:

Fil and ētach meicc ind Rīg	ro-chēs ar cech <i>ōin</i> ,
fil and ind fuil ferr cech fin	dolluid assa th <i>òib</i> .

Another example: Lismore Lives, ll. 3502 ff.

38. Crō cummaisc etir rannaigecht mõir ocus sruth di aill, $7^1 + 3^1$: Conchobar cath mergech mõr tentech trēn,

dīburgud d'arm	rindech	rūad	grindech	gēr
----------------	---------	------	----------	-----

39. Bairdne fodesin, $5^2 + 6^2$:

Cē gabtha Goidil gāir fer nĒrenn uille, consnī cert clainde sīl Cuind co Tūaig tuinde.

35 B. Stanzas with rhyming couplets, containing homosyllabic verses and heterosyllabic verse-ends.

40. Dian midseng chenntromm (cf. p. 18 note), 8² + 8⁴:

Māel-Sechlaind mac Domnaill dathgil, dorn i Tailtin túlgatānaig, daig nā daim crannchor, mo chara, anfad mara múlbratānaig.

41. Ae freslige, $7^3 + 7^2$:

A chell chāem, ro-chūalamar do chlār cen chrād, cen chrēdim : nī hamlaid ro-fūaramar mar atā a tāsc fo \overline{Erinn} .

Other examples, LL. p. 43^b7; RC. 24, p. 182, 1; Acall. l. 726 ff, 1839 ff, 2210 ff.; Zeitschr. v., p. 21; Ériu ii., p. 92; O'Grady, Cat., p. 601.

42. Ae freslige bec, with shortening of the first verse to three syllables :

I mBennchur atā Mongān mac F*iachna*, is leis atā Conchobur ar grafaind scailte sc*iathcha*.

Imr. Brain, p. 86.

43. Ae freslige aicclech (cf. § 19, 1):

Descert Laigen longphortach, līmtha a n-airm rigni rūada, clanda finda Férgusa, fir dia ndérnus-sa dūana.

44. Crō cummaisc etir rannaigecht möir ocus casbairdni, 7³ + 7¹:

A hūi Scēlīn scuitemail, a scol cille cinn ar ch*inn*, a folt gobann gatbēmnig, a chorann macclērig m*inn*.

20

45. Forduan, $7^2 + 7^3$:

Dairbre deligthe Dairbri, eochrann oclaechda uillech ili aidbli óssoca, dırech duillech dóssfota.

46. Dian airseng or cummasc rannaigechta mõire ocus casbairdne, $7^1 + 7^3$:

 \overline{O} nd aidchi dos-fuc a fer ro-bāi a teg i t*áirngire*, taitnem rindnime do rõt, findbile öc *áinglide*.

Other examples, Tochm. Ferbe, l. 100 ff.

47. Rannaigecht chummaisc or dechubaid fota, $7^1 + 7^2$:

Ba ed ascnam isin flaith mad dia ndernta a chómol, in Rī beres breith for cāch, a serc ocus a ómon.

48. The same metre, with shortening of the first verse to three syllables :

Clocān bind benar i n-aidchi gāithe,

ba ferr limm dola ina dail indās i ndāil mnā bāithe.

50. Dā trian rannaigechta moire, $4^2 + 4^2 + 4^1$, a stanza of six verses.

51. Snām sūad, $3^1 + 3^1 + 3^1 + 3^3$, a stanza of eight verses :

In t-ēn bec ro-lēc fet do rind guib gl*ánbuidi*, fo-cerd fāid ös Loch Lāig lon do chrāib c*árrbuidi*.

36 C. Stanzas with rhyming couplets, containing heterosyllabic verses and verse-ends.

52. Dian midseng (seudna mhor, according to O'Molloy), 8² + 7³. O'Grady, Catalogue, p. 413:

D' fir chocaid chomaillter sithchāin, senfocal nāch sāraigther, nī faghbann sith acht fer faghla fedh Banbha na mbānfoithredh.

Other examples, ib. p. 415; Silva Gad., p. 373; ib. 388, l. 30. This is the metre which Thurneysen regards as the source of most Irish rhythms. See RC. vi., p. 336 ff.

NOTE.—In all *sētrad* (*seudna*) metres the internal rhyme called *aiccill* (§ 19, 1) is obligatory. There is often alliteration between the word in cæsura and the first word of the following verse.

^{49.} Sembairdne, $5^3 + 5^2$.

53. Sētrad mõr or fota (seudna, according to O'Molloy), $8^2 + 7^1$:

Son a gotha Coluim Chille, mor a binne os cach cleir:

co cenn coic cet deac cemmenn, aidble remmenn, ed ba reil.

Other examples, RC. 20, 168, l.2; LL.p. 136^b15; O'Gr. Cat. p. 423; ib. p. 472; ib. p. 507; ib. p. 539; Silva Gad. p. 287; Book of Rights, p. 32; Archiviii., p. 241. Fél. lxxiii. 32. Zeitschr. vi. p. 271.

54. Sētrad ngablānach, 10² + 9¹.

A gilla leochaille Lecaig Mo-laise,	a leca cuirre garbglaise
	grīan,
a seche corcra, a chac ar maslaid,	a rethe folta fásaig ar
	fiad.

55. Ollbreccad dene cenntruimme, 8² + 10⁴.

56. Seudna mheadhönach (O'Molloy), 83 + 72.

Ferr silled na salm nemdaide dogníthi ar lepthaib l*inne*; mairg dogeib in nglóir n-étarbaig, óid ar brécsalmaib b*inne*.

57. Ollbairdne, $4^2 + 8^3$.

Archiv iii., p. 234 (Goffraidh o Clerig cecinit):

Dligid īasacht a indlacud re atarba,

ní hē as innraic intē nach indlaic a acarda.

In the following example the first verse varies between 4^1 and 4^2 :

A Rī na rīg, is tū mo dīn, mo d*indbile*, amlat uile, a Maic Muire *ingine*.

58. Setrad mbaccach, $8^2 + 5^1$:

Goll Mena do muintir Grācāin, Gall ac cnuāsach cnō, ballān i mbī bainne lomma dalla Dromma Bō.

59. Sētrad ngarit, 8² + 3¹.

LL. p. 174*:

Tāncamar fri himlūad n-athisc duit, a ri,

õ Meidb is õ Ailill amra, calma a $cr\bar{i}$.

Other examples, LL. p. 302^{b} ; King and Hermit, p. 14 ff.; LB. p. 262^{a} ; Book of Rights, p. 168; Aisl. Meic C., p. 81, 1. 60. Dechnaid aicclech (cf. § 19, 1) cummaisc, $4^1 + 8^2$:

A oclaig oic,	nocho n-urusa do tháthair,
is mõr do nert,	is acut ata cert Cáthair.

61. Dian airseng impoid, 43 + 81 (cf. no. 46):

A Erennaig,	do drochrannaib is lomnān d <i>orn</i> ,
a Albanaig,	a Lochlannaig, a goblân gorm!

62. $Cr\bar{o}$ cummaisc etir casbairdne ocus lethrannaigecht, $7^3 + 5^1$.

LL. p. 47ⁿ:

Cerball Currig chāem-Life, clōd catha for Cond, la aicsin a āebdreche ar-bath Cnogba corr.

Other examples, *Eriu*, i. p. 122; ii. p. 55; iii. p. 13; Táin Bó Cúalnge, ed. Windisch, l. 3624; Acall. l. 2956 ff.; ib. 6415 ff.; Silva Gad., p. 160; ib. 214; Lismore Lives, l. 782; Book of Fenagh, p. 182; Book of Rights, p. 62; Zeitschr. vi. p. 271.

63. Ae freslige ar dechnaid, $6^3 + 5^2$ (cf. no. 41):

Miscais na ngataige	gebas tech Temra,
sraigles na slataige,	seig foltfind Ferna.

Other examples, Book of Rights, p. 136; Battle of Mag Lēna, p. 122, $6^3 + 5^1$, SG. i., p. 384.

64. Immardbairdne, $6^3 + 4^1$.

LL. p. 8^b41:

 \overline{O} Lumnech longadbal, lethan a lār, co Drobāis drongarmglan ris' tiben sāl.

65. Crō cummaisc etir rindaird ocus lethrannaigecht, $6^2 + 5^1$.

LL. p. 4^b, 6:

Do-luid anair Cessair, ingen Betha in ben, cona coicait ingen, cona triür fer.

Other examples, Lismore Lives, p. xviii, l. 9. A metre $6^3 + 5^1$ occurs in Silva Gad., p. 38_{\pm} .

IRISH METRICS

- 66. Anair trebraid¹ or imbas forosna, $6^1 + 5^2$ or $3^1 + 3^1 + 3^1 + 2^2$: Fēgaid ŭaib sair fo-thūaid in muir mūaid m*īlach*, adba rõn rebach rān ro-gab lān l*īnad*.
- 67. Mimasc, 43 + 61:

In acabair Aed Connachta 'sind \tilde{ath} ? atcondcamar cid a sciath ar a sc \tilde{ath} .

68. Loid trebraid bec, $5^3 + 4^2$ (eight verses in the stanza).

Stanzas of different structure

37. Only a few out of a large number of complicated metres are here given. For a fuller account see Thurneysen, l.c. p. 158 ff.

69. Loid luascach is an extension of debide scaille (no. 24), to which it adds a fifth verse rhyming with the second.

Otia Merseiana, II. p. 82:

Is län ler, is lomnån m <i>uir</i> ,	is alaind ind étharbruig,
ro-lā curu in gāeth gánmech	imm Inber na dā ánmech,
	is lūath lūi fri l <i>éthanmuir</i> .

70. In a certain group of metres called *cochraid*, a number of verses of like structure is at regular intervals interrupted by a verse of shorter structure. If the former end in trisyllables, they are as a rule without rhyme, which is confined to the intervening short verses.

Eochraid cūicsrethaid, $4 \times 6^3 + 4^1 \parallel 4 \times 6^3 + 4^1$:

Coimdiu cāid cumachtach, Crīst cain, ar clothbile, comarba nōibnime, nertaid fīal fīrinne fri ferba fāth,

¹ Trebraid is used to denote the occurrence of consonance throughout.

mac Maire ingine, Isu ard airechda, ar n-ardflaith oirdnide, ri betha ic breithemnas ar brīg do br*āth*.

71. Recne dechubaid, $3 \times 6^3 + 4^1 \parallel 3 \times 6^3 + 4^1$. Archiv, iii., p. 217; ib. 219; Rev. Celtique, xv., p. 302. Other arrangements: $3 \times 6^2 + 5^1 \parallel 3 \times 6^2 + 5^1$, Silva Gad., p. 382.

 $3 \times 7^3 + 5^1 \parallel 3 \times 7^3 + 5^1$, LL. p. 298^b; Book of Fenagh, p. 194; Aisl. Meic Congl., p. 81, 19.

 $2 \times 7^3 + 5^1 \parallel 2 \times 7^3 + 5^1$, Aisl. Meic Congl., p. 35.

72. If, however, the larger lines end in disyllables or monosyllables, they rhyme within either half of the stanza.

Ochtföclach mör, 3 × 6² + 5¹ || 3 × 6² + 5¹:
'Can as tic mac lēgind ?'
'Ticim o Chlūain chēlbind;
iar lēgad mo lēgind tēgim sīs co Sord.'
'Indis scēla Clūana!'
'Indisfet 'na cūala:
sinnaig imm a hūaga ethait brūana bolg.'

Other examples, LL. 195^b36 (Rev. Celt. xv. 422); Táin B6 C., Il. 3035, 3258, 3309, 3319, 3349; Rev. Celt. vi. 176; ib. xv.-319; ib. xxiii. 426, §48; Silva Gad., p. 382.

Other arrangements :

 $2 \times 6^2 + 5^1 \parallel 2 \times 6^2 + 5^1$, Zeitschr. vi , p. 257. $2 \times 4^2 + 3^1 \parallel 2 \times 4^2 + 3^1$, Aisl. Meic Congl., p. 79, 7.

73. Lethmimasc is a very artificial metre with debide rhyme arranged as follows: $3^2 + 7^2 \parallel 7^1 + 3^1 \parallel 7^3 + 7^1$.

Nīrb *ingnad* i tig Chunnmāil cháilf*innach* salann for arān cen imm. Is mén*ann* ro-secc feoil a muintire amail seccas rūsc imm chr*ann*. 74. Droignech is the name of a metre consisting of stanzas of four verses with trisyllabic ending. Each verse may contain from nine to thirteen syllables. The second and fourth verses rhyme. The concluding words of the first and third verses must rhyme with a word in the next verses, and consonate with the end-rhymes.

O'Grady, Catalogue, p. 399:

Degšamhail Ghuaire, fiorthobar¹ in f*ioroinigh*, c*iochoighir* in chriochślŏigh as buaine fā bh*uanfolaibh*, ua na gcaithbheodhach as cōra do Gh*aoidhealaibh*, flaithleoghan don t*saoirfeadhain* as crōdha dā gc*ualabhair*.
